

Project 2 - Fractal Plots

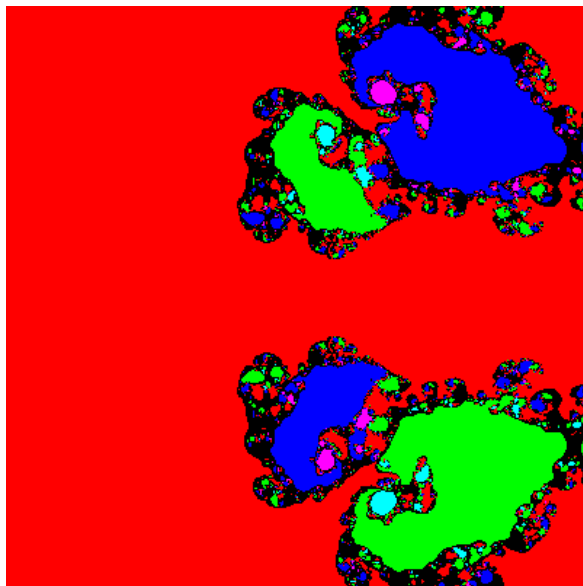

For the following plots I used the polynomial

$$P(z) = (1 + i) + (2 + 2i)z + (3 + 3i)z^2 + (4 + 4i)z^3 + (5 + 5i)z^4 + (6 + 6i)z^5$$

where the origin is at $-2 + i$ and the square has a width of 2.

(a) Fractal dark

(b) Fractal light
